

Fixing our broken housing system

Everybody's Home 2019 NSW Election Platform

The housing crisis in NSW is worse than anywhere in Australia.

More are renting than ever before

1 in 3 households are renters

But there's still **no protection** from unfair eviction

Close to **300,000 households** are in rental stress and struggling to pay for basics like food and power bills

1 in 2 low income renters are in **rental stress**

Less than 1% of properties are **affordable** for households on income support

Across Sydney and much of NSW social housing waiting lists are over 10 years

60,000 households are on the social housing register

We are **short 140,000** social housing **properties**

And NSW is number 1 in Australia for homelessness

Every night **over 37,000 people in NSW** are homeless

Homelessness in NSW increased by **37%** in just 5 years

We need to fix it now so that everybody in NSW has a home

That's why this NSW election Everybody's Home is calling for:

1 A Housing Strategy that invests in **5,000 new social houses a year**

to give renters struggling in the private rental market a safe, secure home that they can afford

2 Protection for NSW renters against unfair evictions

so they aren't at the whim of landlords who choose not to do the right thing

3 A real plan to end homelessness in NSW by 2030

that's properly funded and gives people the support they need to stay housed

Join us and demand that our politicians fix the broken housing system in NSW!
